

Utility M.A.N. Safety Railing System

The Utility **M.A.N.** (**M**odular, **A**ddjustable, and **N**o-weld) is designed to protect utility company assets such as water valves and meters, gas meters, headers, and electric transformers from being damaged by mowers or other vehicles.

- Modular design for easy transportation.
- Adjustable length & width from 3' to 5'
- No-Welding required.
- Simple installation
- Custom logo to identify your property.
- Powder coat (custom colors available)
- Triangular railing also available.
- High-intensity reflective tape.

Each corner post comes with easy to locate high-intensity reflective tape with ASTM approved adhesive.

Tap Gate™ offers the ability to add YOUR LOGO on reflective material to identify your property.
